

PEDIATRIC MILESTONES & MOTOR SKILLS SCREENING

Unsure if your child could benefit from pediatric physical therapy? Join us for a FREE 15-minute after-hours screening session!

Parents often hear how important it is for children to meet their age appropriate milestones, but you may be wondering - what exactly does that mean?

From the youngest babies to high school athletes, Courtney Siwek, PT, DPT has a passion for helping children meet their developmental milestones, recover from injuries, and live with the fewest restrictions possible.

We understand it may be difficult to schedule an appointment during your work day, especially when you're not sure your child will benefit. This low pressure, free 15-minute screening event is offered after hours, allowing you and your child to meet with Dr. Siwek to discuss and evaluate your child's potential needs. Dr. Siwek can then help you decide if physical therapy may be a good fit to help your child thrive.

Courtney Siwek, PT, DPT

THURSDAY, JUNE 16TH

Screening slots available from

4pm - 8pm

Conditions that commonly benefit from physical therapy include:
